## USUAL RESIDENTS PROFILE EXPLANATORY NOTES

### INTRODUCTION

1. The Usual Residents Profile differs from other Census Community Profiles in that it provides data based on where people 'usually' live or their 'usual address' rather than where they were counted on Census night.
2. 'Usual' address is that address at which the person lived or intended to live for a total of 6 months or more in 2001.
3. This profile provides 28 tables based on Usual Residents of Statistical Local Areas (SLAs) and aggregates of SLAs and is available for the following geographic levels: SLA, LGA, SSD, SD, S. Dist., Postcode of Usual Residence, State and Australia.
4. Information was collected from the 2001 Census of Population and Housing.
5. Each table title in the Usual Residents Profile consists of two parts. The first part lists the variables used in the table. The second part describes the table population.
6. A glossary of terms and concepts used in the Usual Residents Profile appears below.
7. **For more information on classifications and Census concepts, see the 2001 Census Dictionary (Cat. No. 2901.0).**

### GLOSSARY

#### Employed full-time/ part-time

8. Employed full-time means that the person worked 35 hours or more in all jobs held during the week prior to Census night. Employed part-time means that the person worked less than 35 hours in all jobs during the week prior to Census night.

<p>Employed full-time/ part-time (cont'd)</p> <p>Nfd</p> <p>Postcode of Usual Residence</p> <p>Social Marital Status</p> <p>Table Population</p>	<ol style="list-style-type: none"> <li>9. For Census purposes, people who stated they were employed, but worked zero hours in the week prior to Census night have been coded to 'employed part-time'.</li> <li>10. Nfd means 'not further defined'.</li> <li>11. POCUPC is derived from the postcode of usual residence as reported by the respondent in answer to question 7 on the Population Census form. POCUPC comprises all Australia Post postcodes (except secondary postcodes) valid at the time of the Population Census plus several codes used to classify uncodeable responses. The total of the States and Territories does not add up to the Australian total because some postcodes cross State borders. Some postcodes may be counted in more than one state.</li> <li>12. Social Marital Status is the relationship status of an individual with reference to another person who is usually resident in the household. A marriage exists when the two people live together as husband and wife, or partners, regardless of whether the marriage is formalised through registration. In the 2001 Census, where information about same-sex couples is volunteered in the relationship question, it is included in the family coding and classified as a partner in a de facto marriage.</li> <li>13. Table population is a description of what the table is counting. For example, tables containing marital status usually have a table population of persons aged 15 years and over. The population appears under the table title.</li> </ol>

## USUAL RESIDENTS PROFILE EXPLANATORY NOTES (cont'd)

### DATA QUALITY

14. For further information on the data quality of Indigenous census data, see *Population Distribution, Aboriginal and Torres Strait Islander Australians* (Cat. No. 4705.0). This publication presents counts for Aboriginal and Torres Strait Islander Australians from the 2001 Census for Indigenous geographic areas, accompanied by information on data quality to help interpret the data. Population estimates of the Indigenous population based on the 2001 Census are also included. For comprehensive information on the quality of Indigenous census data, see *Population Issues, Aboriginal and Torres Strait Islander Australians* (Cat. No. 4708.0).

15. The Census is subject to a number of inaccuracies resulting from errors by respondents or mistakes in collection or processing of the data. Some of these are overcome or 'repaired' by careful processing procedures and quality management of the processing itself. The effect of those that remain is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:

#### Partial non-response

16. In some cases where an answer was not provided to a question an answer was imputed or derived (often from other information on the form). In other cases a 'not stated' code was allocated.

#### Processing error

17. While such errors can occur in any processing system, quality management is used to continuously improve the quality of processed data, and to identify and correct data of unacceptable quality.

#### Random adjustment

18. Cells containing small values are randomly adjusted to avoid releasing information about particular individuals, families or households. The effect of random adjustment is statistically insignificant.

#### Respondent error

19. Processing procedures cannot detect or repair all errors made by persons in completing the form, therefore some may remain in final data.

20. Although the Census aims to count each person once, there are some people who are missed and others who are counted more than once. A post enumeration survey is conducted soon after the Census to measure the undercount.

21. Further information on data quality will be provided progressively in *Census Update* and in the 2001 Census fact sheets and working papers.

U01 SELECTED CHARACTERISTICS

Persons

	<i>Males</i>	<i>Females</i>	<i>Persons</i>
Total persons	5,059	4,980	10,039
Counted at home	4,787	4,699	9,486
Aged 15 years and over	3,808	3,852	7,660
Aged 65 years and over	651	788	1,439
Born in Australia	4,574	4,461	9,035
Born overseas(a)	244	289	533
Speaks English only	4,844	4,747	9,591
Speaks other language(b)	40	46	86
